

ResQFood – User Manual

A Real-Time Mobile Platform for Food Donation Tracking

1. Introduction

Welcome to **ResQFood** (also known as Feed). This mobile application is built using **Kotlin** and **Firebase** to solve the issue of local food waste by bridging the gap between food donors and those in need. Whether you are a restaurant owner with leftover food or a volunteer looking to pick up meals for a shelter, this application makes the coordination instant and visual using real-time maps.

2. System Requirements

- **Operating System:** Android 7.0 (Nougat) or higher.
- **Permissions Required:**
 - Internet Access (to connect to the Firebase Realtime Database).
 - GPS Location Access (to display and find nearby food donation sites on Google Maps).

3. Step-by-Step Application Guide

Step 3.1: Account Creation & Authentication

1. Launch the app on your Android device. You will briefly see the **Splash Screen**.
2. If you are a new user, tap on **Sign Up**. Enter your name, email address, and a secure password, then click register.
3. If you already have an account, enter your credentials on the **Login Screen** and tap the login button to enter the application.

(Tip: Insert your login_screen.png or signup_screen.png here to show how it looks!)

Step 3.2: Navigating the Main Dashboard

Once successfully logged in, you will arrive at the main **Dashboard**. From here, you can choose your primary action path depending on whether you want to donate food or look for available donations.

Step 3.3: How to Post a Food Donation (Donor Portal)

If you have surplus food to share with the community:

1. Navigate to the **Donor** section from your dashboard interface.
2. Fill out the simple food listing form. Enter details such as:
 - a. Food item name or description.
 - b. Quantity available.
 - c. Expiration time or safe pickup window.
3. Your current location coordinates are fetched via GPS. Tap **Submit**.
4. The information is instantly saved and synced to the **Firestore Realtime Database**.

Step 3.4: How to Find and Claim Food (Receiver Portal & Maps)

If you are a receiver, charity volunteer, or community organization:

1. Navigate to the **Receiver** section from your dashboard interface.
2. You can browse a live list of active food listings updated in real time.
3. Tap on a specific listing to open the interactive **Google Maps View**.
4. The map will place a marker showing the donor's precise location. Use the integrated map markers to navigate directly to the pickup location.

(Tip: Insert your dashboard.png or map_view.png here!)

4. Troubleshooting & FAQs

- **Q: The map is not loading or showing my location.**
 - **A:** Please ensure your phone's GPS location services are turned on and that you have granted location permissions to the ResQFood app in your phone settings.
- **Q: The listings are not updating.**
 - **A:** Check your internet connection. The app requires an active cellular data network or Wi-Fi connection to sync with the Firestore database.
